DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/14/2005 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claimed limitation of "the reservoir is fixed to a header pipe of the radiator" renders the scope of the claim indefinite since it is not clear how many header pipes that the reservoir is fixed to. It appears in the claims that the reservoir is fixed to two header pipes, one is recited in claim 1 (a header pipe of the larger heat exchanger) and the other is a header pipe of the radiator. It appears in the specification the reservoir is fixed to only one header pipe.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/807,962 Page 3

Art Unit: 3753

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Heraud (US 5,505,253). Heraud discloses (figures 1-3) a vehicle heat exchanger comprising a larger heat exchanger (10) and a front most heat exchanger overlapped with each other in a direction of air flow, each heat exchanger comprising heat exchanger tubes (12) arranged side by side with each other; outer fins (14) interposed between neighboring heat exchanger tubes; header pipes (16,18,66,2) connecting and communicating with both ends of the heat exchanger tubes for heat conducting media to circulate through the heat exchanger tubes and the heat pipes; the larger heat exchanger (10) further comprises a reservoir (36) in communication with the header pipes (16,18) for reserving one of the heat conducting media and being fixed to a header pipe (16) of the larger heat exchanger; wherein the reservoir (36) is located behind a plane extending through an intake of the front most heat exchanger (62), and wherein an air flow is introduced into the intake, and wherein the reservoir (36) is located alongside the header pipe (16) of the larger heat exchanger. Regarding claim 5, Heraud discloses that the heat exchangers (10,62) have ends (top and bottom) in a direction that the heat exchanger tubes (12) are stacked, respectively and the ends are fixed to each other by a side plate (58)

Allowable Subject Matter

Claim 2 would be allowable if rewritten to overcome the rejection(s) under 35

U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. Applicant is suggested to remove the redundant subject matter of "wherein the reservoir is fixed to a header pipe of the radiator" since claim 1 already recites that the reservoir fixed to a header pipe of the larger heat exchanger and then in

Application/Control Number: 10/807,962 Page 4

Art Unit: 3753

claim 2, the larger heat exchanger is the radiator. Therefore, the suggested removal subject matter does not further define the scope of the claim but confuse the scope of the claim.

Claim 8 is allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tho v. Duong whose telephone number is 571-272-4793. The examiner can normally be reached on M-F (first Friday off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Keasel Eric can be reached on 571-272-4929. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
